

Cagney Contract Cleaning

Cagney Contract Cleaning have been maintaining Milliken Carpets for over twenty years. As the only Milliken approved contractor in Ireland we are best placed to advise you on the cleaning and maintenance of your floor covering.

Using only Milliken approved products and a tried and tested dry maintenance system, we will design a bespoke programme to suit your needs. This programme will be completed on a quarterly basis and will be followed up with a stain management programme. In addition, stains can be managed as part of the daily office cleaning schedule. The implementation of this system will ensure that you receive optimum value from your floor covering.

Tea / coffee stains can be unsightly and may cause permanent damage

Stage 1: Milliken Capture pre-spray is applied to the stain

Stains are carefully removed, working from the outside to the inside

Milliken Capture powder is applied and agitated into the carpet

Powder is thoroughly vacuumed. Severe stains may require secondary treatments

The carpet maintenance programme can be used throughout your office.

Milliken Capture powder is applied and agitated into the carpet and then thoroughly vacuumed.

In conjunction with a properly managed daily office cleaning schedule and an appropriate stain management programme you will be assured of optimum value from your carpet

Although there are several methods available for cleaning carpet, the use of Milliken's Dry Clean Maintenance Programme will ensure that your carpet is kept in pristine condition while ensuring that the area is ready for use once it has been cleaned.
